## SHIP-BY-TRUCK

### CARAVAN

**Caravan of Motor Trucks In Wauseon Monday. Suggest Possible Solution of Problems Connected With Transportation**

Good Roads and Ship-by-Truck week was ushered in by the advent of a caravan of 14 motor trucks and accompanying automobiles in Wauseon at about 11:30 Monday. Fleming and Hough joined the procession with one of their trucks and one of the Van Camp Fleet was also noticed lined up with the visitors. The auto truck or motor truck is already a factor in American transportation and is bound to become a more important factor in the future. This means that the main market highways will have to be constructed to stand the terrific strain and wear which this modern means of freight transportation puts upon them. The short haul by motor truck is established and the time is not far distant when the short haul will increase until it becomes a long-haul. Provisions essential to the life of the city populations must be transported from the places of production to the chief merchandise essential to life and industries of the rural sections and smaller towns must be transported from the central points of distribution to these places. The railroads have been unable to handle adequately the distribution of these absolute essentials. It makes no particular difference just why the railroads have failed in this distribution, the fact remains that there is no guarantee that the future will bring any radical change in the situation. Relieved of the short distance carriage and the interchange of many of the food stuffs and essential articles of merchandise, the railroads would be left free to carry fuel, raw materials such as ores, and make the long haul between the principal distributing centers and the result would be avoidance of industry without the necessity of shut-downs caused by lack of materials or inability to ship out finished products and the end of local "famines" in various food staples.

Such is bare outline is the argument for the "Ship-by-Truck" idea; but in order to carry out this idea there must be good, well built and carefully maintained roads. On this point we find ourselves in hearty agreement with the Washington representative of the National Grange, who advocates all national and interstate highways, the main arterial and transcontinental thoroughfares under one Federal hand and the more even and widespread distribution of the cost of construction and maintenance among all the people of the country, rather than placing the heaviest share of the burden upon the people of the section through which such highways pass.

With the main national arteries of highway travel and traffic cleared for each state could provide for the food, interstate and town highways. When "Good Roads Week" does nothing more than arouse public interest and direct public attention to these important matters of transportation it will have been worth while. When, as some dealers can provide motor trucks and motor truck tires either on credit or on a lease basis, and are ready to advise in regard to the suitability of tires and trucks to the various kinds of service required of them, so far as motor vehicles and tractors are concerned Wauseon is a "complete town" and the county need not look elsewhere to have all their wants along this line cared for.

Six well equipped garages and auto sales establishments besides auto tire, motor and sales places, efficiently and effectively care for the "rolling stock" equipment for Fulton County motor transportation system.

Have just received a fine line of all-weather hats both in straw and cloth. Samuel Ruppert.

See Chase F. H. Hough for that latest style auto seat top in grey. 2-6-c

## FIRMER SANITARY CODE IN PROSPECT

Less fumigation but more cleaning may be required. Gaseous disinfection or fumigation after communicable diseases will be done away with, except in case of smallpox, if the advisory council of the state health department today adopts the proposed new sanitary code formulated by Health Commissioner Freeman.

Concurrent disinfection while a case of illness is in progress, however, will be as strict as at present, if not more so, and cleaning of property washing with soap and water, for instance, and wall paper cleaning, will be much more rigid after the termination of certain diseases. Other subjects touched on in the code relate to reporting of diseases, control of social diseases, transportation of bodies medical inspection in schools, maternity hospitals, ice cream stands and regulations of barber shops, manicurists and chiropodists. If adopted the code will be filed with Secretary of State Smith and after July 1st have the effect of law. City and county health officers meeting at the Southern last week named a committee to draft a tentative uniform, medium milk inspection standard for all cities.

**STORE EGGS TO AVOID HIGH WINTER PRICES** With eggs going into storage at over 40 cents a dozen, poultry specialists of the College of Agriculture say that eggs are almost sure to be high in price next winter.

To avoid these prices the consumer will find it profitable to buy eggs now and preserve them in a solution of water glass. The following method is practical for the house wife who desires to preserve a case (30 dozen) of eggs for winter use. Obtain three pints of water glass (Sodium Silicate) at a drug store and mix it with 27 pints of cold boiled water. Place fresh clean eggs carefully in a 10-gallon earthenware jar. Be sure that none of the eggs are cracked, old or dirty. After putting the eggs in the jar place a large plate over them and pour in the water glass solution until the plate is submerged under two inches of liquid. If one desires to preserve the eggs from day to day, the solution may be put in the jar and the eggs placed therein as gathered until the jar is full. The heavy paner over the top of the jar and move it carefully to a cool place where it may remain until ready to use the eggs. Remove them from the solution as needed and wash with cold water. If one desires to boil them, prick one or two small holes in each egg with a needle. This will prevent the contents from breaking the shell.

**CREAM, BUTTER AND EGGS** Market reports and predictions from Swift and Company of Chicago for this week are as follows: The volume of cream delivered to creameries this week will show some increase over the previous week but it is lighter than a year ago. Last year there was some butter bought for export, but conditions do not now appear favorable for foreign purchases. It is fairly a considerable quantity has been imported during the last few months, and there are reports of further importation from foreign producing countries.

The markets during the week reflect this condition and wholesale prices are lower in the large consuming centers. Eggs are beginning to show the effect of warmer temperatures and buyers are more careful in their selection. Prices due to lighter demand, are slightly lower.

It is very important that eggs be gathered daily, kept in a cool place and marketed frequently. The movement of poultry is about normal and prices show only nominal changes from last week. On account of lighter storage stocks, it is expected that values will be sustained for the next thirty days.

Williams' A Clean Place to Eat 7-7

## COUNCIL MEETING

At Council meeting last Monday evening Mr. George Oakley, president of the council, presided in the absence of the Mayor, C. M. Bulger.

A request from the firm of Fleming and Hough for permission to place an electric sign in front of their place of business on North Fulton Street was referred to the sidewalk and street committee. Mr. Sam Morningstar presented a request for drainage of storm water on Marshall Street. The sewer committee reported investigation and recommended action in repairing storm sewer. Mr. Ed Moden was granted permit to move the old hand stand from its present location to his farm. Mr. Sloan of The Ohio Gas, Light and Coke Company was present and stated as reasons why his company had filed an appeal from the \$200 Gas Rate fixed by Ordinance passed by council, with the State Board of Public Utilities was to the credit of their company in the financial market and because of the uncertainty in cost of coal. Mr. Sloan reiterated his statement that the company must maintain rates that will cover cost of production and a profit of at least 7 per cent on amount of money actually invested.

Mr. Sloan professed himself desirous of settling the matter before it came before the State Board of Public Utilities for hearing on June 8th and described the method adopted at Bryan where an expert engineer has been employed to make a survey and report of the plant of the gas company the cost of operation etc. and recommended the adoption of rates on a sliding scale that will at all times give the company a profit of 7 per cent over cost of production. Mr. Sloan suggested that a similar arrangement be made in Wauseon. Councilmen asked Mr. Sloan if he would accept a rate of \$2.10; he stated that he could not do this. On motion the matter was tabled to be taken up at an adjourned meeting of the Council on Monday May 31st. Council to inform the Gas company of the action taken.

Permission was granted to F. R. Harper to construct drive to and erect canopy over filling station on the boulevard in front of his premises on North Fulton Street between sidewalk line and curb.

Councilman Barkdull introduced the matter of the annual clean up day; after discussion the council set May 27th, 28th and 29th as the dates for the annual clean up and authorized a charge of 15c per barrel for hauling away the rubbish.

The Street Commissioner was instructed to repair breaks on all streets which are in the process of repairing water mains and pipes.

A resolution was passed ordering the Wabash Railway to install and maintain a light at the Shop Avenue crossing of that railroad.

J. L. Socie was nominated as a member of the Council to fill vacancy. On motion the matter of the petition for Road Chestnut Street improvement was laid on the table until December 27th, 1920.

Claim ordinance was passed and the council went into executive session.

**SPECIALIST TO AID IN FARM MARKETING**

Z. B. Wallin, professor of rural economics at the Utah Agricultural College, has been employed as an extension specialist by the Agricultural College Extension Service of the Ohio State University to offer information on farm market methods and practices. He will also act as farm agent in undertaking such on-farm enterprise as live stock shipping associations and elevator companies.

**HIGH SCHOOL BASE BALL** With a new discovery in the box, we should go now. When Robinson made his debut at Delta he showed a world of speed and control. He did not become rattled, once he charge a man three balls in succession and then struck him out. He struck out nearly an average of two batters an inning. They were only able to get one hit and him and their run came on an error.

The weather has not been so sun game can be played until the sun comes out. Three games have been postponed this week.

## APRIL MILK

Van Camp Company Pay Dairymen of This Section

\$86,261.61 for April Milk. Checks Issued for \$50.00 and Over.

Estate of Jesse W. Miley, application filed, bond filed and approved and letters of administration issued to Mary L. Miley, M. L. Eldridge, J. J. Fawner and M. J. Ernst, appraisers.  
Will of William Borton. Commission issued to take testimony of subscribers witnesses to will.  
Will of LaFayette Esterline, testimony of witnesses taken and will admitted to probate and record. Widow election not to take under said will.

Estate of LaFayette Esterline, application filed, bond filed and approved and letters of administration with will annexed issued to W. A. Crane, G. H. Griffin and J. H. Stoner, appraisers.  
Estate of Harry M. Esterline motion for appraisal filed and granted. G. H. Crane, G. W. Griffin and M. Lewis, appraisers.

Marriage Licenses  
Frank Lambert 24 hardware merchant Delta, Ohio and Josephine Lambert, 19 bookkeeper, Delta, Ohio.  
Chas. Garman 29 State Highway Superintendent Wauseon and Gladys May Lambert, 21 Delta, Ohio.  
Beverly Jacobs 20 merchant Lyons and Thelma Green 18 Lyons, Ohio.  
Frank Bowman, 26 farmer, Fayette and Alice M. Benson, 28, school teacher Fayette, Ohio.  
Beulah Brehm 20, nurse, Fayette Ohio.

DON'T FORGET! Salvation Army Week next week May 24th to May 31st. Die down and help the Salvation Army keep on helping those who are at the bottom to come to the top. \$2600 from Fulton County.

Members of Loure Post G. A. R. Spanish War Veterans, Associate Members, Ladies Relief Corps No. 20 and all Fraternal Orders especially the American Legion of Wauseon 1830 and citizens are cordially invited to meet at G. A. R. Hall at 9:30 a. m. on May 31st and join in forming a procession to march to the Wauseon cemetery. The procession will be led by the Boy Scout Band, C. J. Ives in charge. The Program at cemetery as follows:  
Song by Grade School quartette.  
Prayer, C. F. Evans.  
Song, Grade School quartette.  
Short Address, Rev. S. R. Dunham.  
Flag Salute, School.  
Decoration of graves, fourth grade pupils led by committee, H. T. Briggs, G. D. Newman, Jas. King and Ed Mikesell.

Afternoon Program  
At 2:30 all above organizations will meet in front of G. A. R. Hall and proceed to High School Auditorium where the following program will be given.  
Song by High School Boy Quartette.  
Prayer.  
General Logans orders No. II.  
Song, H. S. Girls.  
Lincoln's Gettysburg Address.  
Reading Honor Roll, Post Adj.  
Address of the Day.  
Hon. F. H. Reighard.  
Closing Song.  
Memorial services will be held at the M. E. Church on Sunday May 23rd at 2:30 p. m. sermon by Rev. C. F. Evans. All are cordially invited to attend these services.  
Allen Shadle, Com.  
P. H. Hayes, Adj.

ANNUAL CLEAN UP DAY  
The Council at its meeting Monday evening May 17th, designated Thursday, Friday and Saturday May 27th, 28th and 29th as Annual Clean Up Day in Wauseon. On the dates mentioned citizens who have rubbish (not farm) which they wish removed from their premises will deposit same in barrels or boxes at the street curbside. A fee of 15c per barrel or its equivalent has been authorized by the council to be paid by citizens to parties who haul away such rubbish.

## DEFECTS FOUND IN BABIES AND CAUSE

In examining hundreds of babies the chief cause of defects, found is improper nourishment. Contrary to popular belief, that is not confined to bottle fed babies. It is never wise for a mother to wean her baby except upon the advice of a physician. However, then other infant not feed them solely because the infant is breast fed, it will develop normally. It frequently happens that the breast milks lacks nourishing qualities. In such instances, breast feeding should be continued, but this should be supplemented by a certain amount of bottle feeding.

The breast fed infant has five times as many chances of living as the bottle-fed one. So everything possible should be done to encourage breast feeding. By far the most under nourishment is found in bottle fed infants. Mothers often put the baby on a certain food upon the advice of friends and neighbors. This is never safe. All feeding should be prescribed by a physician. Even in cases where a certain diet was prescribed by a physician for another child and successfully used, it is not safe to use this diet unless a physician has determined it is adapted to this particular baby. It seldom happens that the babies will thrive well upon exactly the same food mixture.

Another error made by many mothers is to believe, because the child is fat, that it is healthfully developed. Some of the canned infant foods make children fat and yet lack essential elements for proper growth. These may occasionally have a proper place in infant feeding, but should only be used in addition to other foods that contain the elements lacking in the canned foods. Only one well versed in infant feeding is able to properly balance such a diet.

The lesson to be taken from the above is that every infant, no matter how well he looks should be regularly examined by the family physician. Only he is able to detect impending trouble before they reach a stage of seriousness. This agrees with the modern idea in medicine of "Treatment before the disease." One of the defects that result from improper nourishment are delayed teething, enlarged joints, bow-legs, anemia, under size, lack of symmetry as irregular head, costed tongue, flabby muscles, discolorations of the skin and general delayed development.

**YOUR LIBERTY BOND**

The United States Government borrowed money from you to finance the War. You hold the Government's promise to pay you back. This promise is called a Liberty Bond or Victory Bond. The Government is standing the conditions under which the Government borrowed the money from you.

For instance: If you hold a Bond of the Third Liberty Loan, it states that on April 15th and October 15th of each year until maturity you will receive interest on the amount you paid for the bond. Other issues have other rates of interest and other maturity dates; all of which are clearly stated on the Bond.

Now, if you keep your Bond until the date when the Government pays you in full for it, you do not need to worry if, in the meantime, the price is low one day or high the next. You and Uncle Sam are living up to your agreement with each other and neither will lose by it.

On the other hand, if you sell your Liberty Bond now, you will find that the more you sell it to will not give you a dollar for every dollar you paid for it. The price has been brought down because so many people are offering to sell their Bonds. If the market is flooded with tomatoes, you can buy them cheap, but if everyone is clamoring for tomatoes and there are few to be had, the price goes up. The same is true of Liberty Bonds. Short-sighted people are dumping them on the market and wise ones are buying them.

The best advice that can be given to the owner of a Liberty Bond is this: Hold the bond you bought during the war; it is as safe and sound as the United States Government itself.

Buy as many more at the present low rate as you can afford. If you hold them to maturity, you are beyond to make the difference between what they sell at now and their face value. You will also receive good interest on your investment.

Hold on to your Liberty Bonds and buy more.

MR. R. H. ELLS, expert licensed optician of Delta, Ohio is now in charge of the Optical Department of the Neuhaus Brothers Store 425 to 433 Summit St., Toledo, Ohio.

Williams' A Clean Place to Eat 7-7

## HIGH SCHOOL COMMENCEMENT

Annual Commencement Exercises Friday, May 28th.

List of Seniors who will Graduate. Baccalaureate Sermon, Sunday May 23rd.

Next week brings the annual close of the school year in Wauseon with the graduation of one more fine class of young people and the termination of a successful year of school work in spite of many drawbacks and difficulties to overcome. The Senior Class this year numbers twenty-six and the class roll is as follows: Elizabeth Biddle, Ceila Borton, Vivian Brown, Florence Dimke, Ethel Howard, Irene Ives, Opal McClarren, Ruth Neuenlander, Ada Waldvogel, Helen Whitman, Florence Williams, Noia Woodard, Wilma Yoder, Earnest Baer, Franklin Fisher, Howard Gorsuch, Sanford Gorsuch, Lyle Harper, Scott Highways, Frederick Lehman, Garand Moine, John Outcalt, Charles Ross, Elmer Schad, Lyle Shumaker, Ivan Whipple.

The Baccalaureate sermon will be delivered at the Christian church next Sunday evening by Rev. S. R. Dunham pastor of the Methodist church.

On Wednesday and Thursday evenings May 19th and 20th the class play will be presented at the High School auditorium and on Friday evening May 28th the Commencement exercises.

Professor Dean of Heidelberg University, Tiffin, Ohio will deliver the Commencement address. There will also be addresses by the honor students of the class and the High School orchestra will furnish the music.
